Hi Class,

Welcome to Web Programming Fundamentals I look forward to working with you in the coming month and want to help you be successful in the course.

This class will be your introduction to programming. You will be learning the basic of JavaScript and the basics of problem solving and programming in general.

I highly recommend you log into WPF the first day it becomes available. Look over the Dashboard and Activities pages and begin planning out your month. My advice is to be proactive and work daily to complete course material rather than waiting to cram on weekends. Be aware that the majority of graded class material will be due on Thursdays during the month.

Please contact me if and when you need help or are not going to be able to make a deadline. If you go “Missing In Action” while in my course you can bet I will be getting a hold of you, either by phone, email, text, aim chat, or carrier pigeon. If all that fails, look in the sky for the bat signal. I enjoy helping and getting to know everyone that takes WPF so do not hesitate to reach out to me.

Thanks,
Dan Williams
